

Empathy Map

Date	25 September 2026
Team ID	SWTID-2026-6721
Project Name	AI FAQ Assistant API
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

User Persona

Name: Priya

Role / User Type: Customer Support Executive / FAQ Content Manager

SAYS

- “I need quick answers to repeated customer questions.”
- “Managing and updating FAQs manually takes too much time.”
- “I want the FAQ information to be organized and easy to search.”

DOES

- Searches existing FAQ records for customer queries.
- Creates and updates frequently asked questions.
- Uses AI assistance to generate answers for common questions.

- Manages FAQ content and categories.

THINKS

- “Can I find the required answer quickly?”
- “Can AI help me create accurate FAQ content?”
- “I need a secure system so that only authorized users can modify FAQs.”

FEELS

- Frustrated when answers take too long to find.
- Overwhelmed by repetitive FAQ management.
- More confident when information is organized and easily accessible.
- Satisfied when AI helps reduce manual work.
