2	Customer Support Chatbot	Medium	High	2	No

Final Selected Idea

After discussing the different ideas, our team decided to combine **AI-powered question answering** with **FAQ management**.

The final project selected by our team was:

AI FAQ Assistant API

The project provides a RESTful backend system for user authentication, FAQ creation and management, FAQ search, and AI-powered answer and FAQ generation using Google Gemini AI.

This idea was selected because it allows our team to work with **Node.js, Express.js, MongoDB, JWT authentication, and Generative AI** in one project.
