

Performance Testing

Date	28 September 2026
Team ID	SWTID-2026-6721
Project Name	FAQ Assistant API
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Thunder Client
Type of Testing	API Testing
Target Module / API	/ask API Endpoint
Test Environment	Local
Test Date	

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Valid FAQ question	Not specified	Not specified	Relevant answer should be returned
2	Another FAQ question	Not specified	Not specified	Relevant answer should be returned

3	Empty question	Not specified	Not specified	Error / validation response should be returned
4	Unknown question	Not specified	Not specified	Appropriate response should be returned

Step 2: Test Scenarios

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not measured	Not verified	Performance measurement not documented
2	Response Time (Max)	< 5 seconds	Not measured	Not verified	Performance measurement not documented
3	Throughput (Req/sec)		Not measured	Not verified	Throughput data not available
4	Error Rate	< 1%	Not measured	Not verified	Error-rate measurement not documented
5	CPU Utilization	< 80%	Not measured	Not verified	CPU utilization data not available
6	Memory Utilization	< 80%	Not measured	Not verified	Memory utilization data not available

Step 4: Observations & Analysis

Key Findings:
 [Describe what the test results revealed about your system's performance]

Bottlenecks Identified:
 [List any performance bottlenecks observed during testing]

Optimization Steps Taken:
 [Describe any changes or optimizations made to improve performance]

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):
