

Problem-Solution Fit

Date	25 September 2026
Team ID	SWTID-2026-6721
Project Name	FAQ Assistant API
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] College websites, educational platforms, company websites, customer support, e-commerce platforms, and help-desk systems	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Depends on available information and AI processing. Gemini AI requires appropriate API access. Other budget/device limitations are not specified	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Traditional FAQ system: Users manually search for answers; it can require more effort and time. AI-powered FAQ API: Provides automated answers, but depends on Gemini AI and appropriate API access
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Manual searching of FAQs, repetitive questions, slow responses to common queries, and difficulty	9. PROBLEM ROOT / CAUSE [RC] Traditional FAQ systems require users to manually search for information. Repetitive questions and	7. BEHAVIOR + ITS INTENSITY [BE] Users submit questions and search for answers to common queries. Intensity:

integrating FAQ systems. Frequency: Repeated/common user queries	slow responses create the need for an automated solution. Integration with other applications can also be difficult	Repetitive/common queries require frequent responses
3. TRIGGERS TO ACT [TR] Need for fast answers to common questions, repeated FAQ queries, and need to integrate an FAQ system with websites or applications	10. YOUR SOLUTION [SL] An AI-powered FAQ Assistant API that accepts a user's question, processes it using Gemini AI, and returns a relevant answer in JSON format through the API. It can be integrated with websites, applications, and other systems	8. CHANNELS OF BEHAVIOR [CH] ONLINE: Websites, applications, educational platforms, company websites, e-commerce systems, and help-desk systems.
4. EMOTIONS BEFORE / AFTER [EM] Before: Not specified in the project text. After: Not specified in the project text		OFFLINE: Not specified
